Thanks for joining us at the Retail Insiders Party!

We were so glad to bring the retail community together and to hear about all the exciting developments taking shape during NRF week and beyond. Here are our top takeaways from the show:

1. **Resilient networking** is becoming critical for staying ahead of the growing bandwidth demands of today's retail technologies.
2. **Digital transformation** is empowering AI functionality throughout the entire retail lifecycle.
3. **Security** is remaining a top priority as retailers work to protect users, devices and data without sacrificing performance or reliability.
4. **MultiCaaS** is enabling smarter, more responsive customer interactions, as it's powered by AI, reshaping what retailers expect from the contact center.

It was great to see you! Let's keep the conversation going on how our solutions can support your vision for the future of retail.
